Maple Training Resources for Students

Visit the [Student Help Center](#) for tons of Maple training resources to get you started and keep you moving, whatever your needs and preferred learning style!

www.maplesoft.com/studentcenter

Brand New to Maple?

Watch [Get to Know Maple, Fast!](#). Don't worry, it's really short. After you've had a chance to play with Maple for a bit, the [Maple Fundamentals Guide](#) is a good next step. Get hands-on training by working through the examples in the PDF version, or follow along with the video.

Learn to Do More in Maple

Once you are familiar with the fundamentals, you'll find many more resources in the [Student Help Center](#) to help you learn more about Maple, including:

Training Videos

From your first steps in Maple to specialized topics, this collection of videos will show you the way.

Jump Right In

Go ahead! Large collection of hands-on tutorials and "How do I...?" topics will guide you in your explorations or help you out if you get stuck.

Like to Read?

The Maple User Manual provides a comprehensive overview, and covers topics including information for new users, mathematical problem solving, document formatting, basic programming, and application creation.

Just Give Me an Example

There are literally thousands of Maple Applications available through the Maple Application Center and the MapleCloud.

Download the free Maple Companion app!

Get math into Maple with a click of your camera and do math directly on your phone!

Need to Talk to Someone?

You can connect with Maplesoft experts and experienced users to get answers to your questions.

Ask a question on [MaplePrimes](#)

[MaplePrimes](#) is the world's largest community of Maple users, and they are a helpful bunch. Search existing posts for a solution, or ask a new question.

Consult an Expert

Check out our [FAQs](#), and if you still gave questions, contact our [Technical Support](#) team.

It's Not the Maple, It's the Math

A lot of Maple is designed specifically to help with learning mathematical concepts. Visit the [Student Help Center](#) to learn about great math app and interactive calculators, tutors, specialized Student packages, and more.
